Experience

Autonodyne - NDA, Software Engineer I

Boston, MA
July 2025 - Present

- Implemented and iterated on new features with human factors engineers and product stakeholders.
- Overhauled existing UI systems to make them more modular and efficient for future use cases.
- Collaborated with exterior companies to create a shared unified product.
- **Skills:** Unity, C#, Gitlabs, Jira, Docker, XML.

Autonodyne - NDA, Software Engineer Intern

Boston, MA
July 2023 - Dec 2023
May 2024 - Aug 2024

- Worked as a solo UI/UX Unity developer for a contract project, using C# on a team of 5 developers.
- Designed and implemented modular UI prefabs to be used by 50+ developers.
- Created UI standards documentation for 50+ developers in Confluence.
- **Skills:** Unity, C#, Figma, Github, Jira, Confluence.

Projects

Moral Optics, Lead UI/UX developer

Sept 2024 - May 2025

- Designed, iterated, and implemented all UI systems in Figma and Unity.
- Ran weekly UX reviews on key systems and interactions to create the most impactful experience for users.
- Worked with my team of developers to identify friction and delegate tasks to the proper owners.

Masked, UI/UX Designer

April - May 2025

- Created high fidelity mockups and prototypes in Figma and ran user tests with them.
- Worked through legibility, clarity, and hierarchy user experience problems to iterate on my interface design.
- Presented and pitched my interface to developers to gather a team to continue development.

Meetcute.mov, Lead Graphic Designer

August 2026 - Present

- Cultivated an identity and cohesive brand look for the project, using key words and experience goals to guide my vision.

Education

BS **Northeastern University**, Computer Science and Game Development

Sept 2021 - May 2025

- **GPA:** 3.93/4.0
